

Valued at \$479: The Primary Arms SLx 1-8x24 FFP Rifle Scope with the ACSS Raptor reticle is a first focal plane optic calibrated in yards for 5.56 and .308 cartridges. It is a popular low-power variable optic (LPVO) engineered to balance rapid, red-dot-like acquisition at 1x magnification with precise holdovers at 8x magnification. By utilizing a First Focal Plane (FFP) design, the reticle scales dynamically with magnification, meaning all bullet drop compensation (BDC) and ranging metrics remain completely accurate at any power.

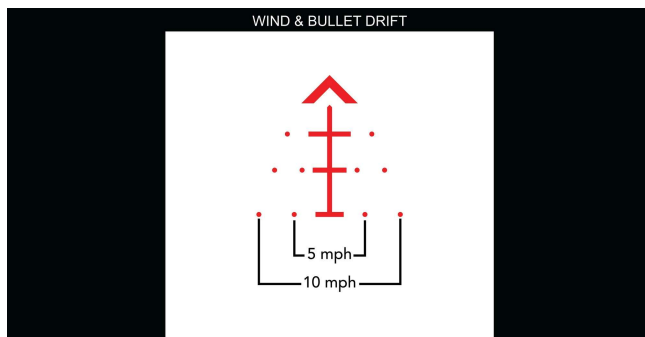

- 8x magnification excels at Close Quarters out to Mid-Range engagements
- Fully multi-coated lenses
- Low profiles capped turrets
- Waterproof and fog proof
- Moveable and replaceable magnification ring
- Weighs just 17-9 oz
- LIFETIME WARRANTY

Key Features

- **First Focal Plane (FFP):** The reticle scales with magnification, keeping the yardage drops accurate at any power.
- **ACSS Raptor Reticle:** Features a horseshoe and chevron design zeroed at 100 yards, with drop markers stretching from 200 out to 600 yards.

- **Windage Holds:** Includes built-in wind dots for 5 mph and 10 mph crosswinds.

- **Illumination:** Offers multiple brightness settings with night vision compatibility, powered by a CR2032 battery.
- **Build:** Built with a 30mm tube, weighing under 18 ounces, with quarter-MOA capped turrets
